■ Features of LX5 Series Tripod Systems

• Efficient and Robust Head Structure

The LX5 head is user friendly and designed with high durability, rigidity, and an efficient metal structure.

• Tripod with Outstanding Stability

The "2-2-1" structure, usually adapted by high end tripod legs, creates outstanding torsional rigidity.

• Slide Plate with High Usability

The wide sliding range allows users to adjust the camera balance quickly and easily. Once the slide plate is attached to the camera, users can attach the camera to the head on either side of the slide plate thanks to its universal attachment design.

• Double-sided Serrations/Rosettes for Libec Accessories

Serrations are equipped on both sides of the head to accommodate an additional pan handle or other accessories such as the Libec AS-7K accessory support arm for monitors.

• Special Carrying Case Included

The padded case gives great protection to the tripod system during transportation.
