LS-70-072 Listen iDSP Prime Level IV
Stationary RF System (72 MHz)

Product Overview:

Offering coverage up to 457.2 m (1,500 ft.), the LS-70 Stationary RF System from Listen Technologies is an ideal way to provide assistive listening in larger venues as quickly as possible. The complete package includes our LT-800-072 Stationary RF transmitter and four of our best-in-class LR-4200-072 iDSP receivers, as well as everything else you need to get set up immediately.

The LS-70 system also includes our LA-381 Intelligent 12-unit charging tray, which provides plenty of capacity for charging, storing, and managing up to twelve (12) receivers. The high-capacity tray allows room for upgrading and expanding your RF system as the demands of your venue grow.

The LS-70 package also includes an assistive listening notification signage kit, cable management unit, log book, disinfecting wipes and more, all in one convenient starter system.

Highlights:

- Advanced DSP SQTM noise reduction technology delivers 20 dB less noise and hiss than any other listening device
- Integrated neck loop / lanyard with DSP loop driver improves the listening experience for T-coil users
- Smallest device of its kind makes it easier to wear and for venues to dispense, store and maintain
- Limited Lifetime Warranty with hassle-free support
- Advanced green battery technology dramatically reduces costs of ownership and hassles while reducing the number of batteries in the landfill
- Includes drop-in charging/dispensing station for streamlined dispensing, collecting and care of up to (12) iDSP RF listening devices
- Ensures public venues deliver an exceptional listening experience while meeting new legislative requirements for assistive listening
