

QD SERIES BLU-RAY TOWER DUPLICATORS

QD SERIES BLU-RAY TOWER DUPLICATORS

Don't let the production of high-quality Blu-ray Discs in large volumes become an annoyingly tedious chore. Whether it's one disc at a time, or hundreds per run, turn to the brand new industry standard for economy performance and reliability—the Microboards QD Series Blu-ray Tower Duplicators. Insert your master in the top drive, place blank discs in the remaining drives, and let it burn!

Get your jobs done fast. All QD Series systems feature 8X BD / 48X CD-R / 16X DVD-R/+R recorders. The intuitive 4-button panel and multi-line display make copying discs a simple procedure for the novice user, while maintaining high-end, power-user features in tact like disc verification mode and adjustable recording speeds for the advanced power user. Towers also include a 500 GB dynamic hard drive for storage of disc images. Connect a single recorder of the QD tower to a PC using a USB 2.0 cable, or use as a standalone system.
