

## MMK 965 Microphone Head

This microphone head with a true condenser capsule in large-diaphragm technology showcases Sennheiser's unrivaled experience in the fields of acoustics and stage technology. Its powerful, high-definition sound makes it one of the best microphone heads of all time. Because of its dual-membrane technology, the pick-up pattern can be switched between cardioid and super-cardioid.

### PRODUCT VARIANTS

|                     |        |                 |
|---------------------|--------|-----------------|
| <b>MMK 965-1 BK</b> | black  | Art. no. 502582 |
| <b>MMK 965-1 NI</b> | nickel | Art. no. 502584 |

### DELIVERY INCLUDES

- MMK 965-1 microphone head
- thread protection
- pouch
- instruction manual

### SPECIFICATIONS

|                                                 |                                                          |
|-------------------------------------------------|----------------------------------------------------------|
| Transducer principle                            | externally polarized dual diaphragm condenser microphone |
| Pick-up pattern                                 | cardioid/supercardioid, switchable                       |
| Sensitivity (free field, no load) (1 kHz)       | 7.0 mV/Pa                                                |
| with preattenuation                             | 2.2 mV/Pa (factory setting)                              |
| Max. SPL at 1 kHz                               | 144 dB                                                   |
| with preattenuation                             | 154 dB (factory setting)                                 |
| Dynamic range                                   | 126 dB(A)                                                |
| Diameter of diaphragm                           | 2.54 cm (1")                                             |
| Frequency response                              | 40 to 20,000 Hz                                          |
| Equivalent noise level A-weighted (DIN IEC 651) | 18 dB                                                    |
| Weight                                          | 162 g                                                    |
