

Concert 88 Camera

Frequency-Agile UHF Wireless System

POSITIONING

Samson's Concert 88 Camera is a professional UHF wireless system that brings exceptional audio quality to film and video production. Featuring 16 selectable frequencies for interference-free operation and a camera mountable receiver powered by a removable rechargeable battery, the Concert 88 Camera provides reliable performance and efficient setup. Available in Handheld, Lavalier and Combo configurations.

FEATURES

Recharge

For maximum user convenience, the Concert 88 Camera offers 12 hours of battery life from a single rechargeable removable lithium ion battery (two included). A battery level indicator lets you know when its time to swap in the backup. The included external battery charger features a USB input for increased compatibility.

UHF Reliable

With a best-in-class 300' wireless range, the Concert 88 Camera operates within the reliable UHF frequency band. This avoids interference from wireless routers and other handheld devices. The system's 16 selectable frequency options allow for multi-location shoots, while tone key signal threshold and selectable Squelch settings provide aggressive interference protection.

Three Configurations

The Concert 88 Camera is available in three unique configurations, including Handheld (Samson's Q8 handheld mic/transmitter), Lavalier (Samson's LM10 lavalier mic with beltpack transmitter) and a Combo system with both transmitter options. For multi-camera shoots, up to eight systems (per frequency band) can be used simultaneously.

APPLICATIONS

- Broadcast, film, ENG (Electronic News Gathering)
- Portable AV

SPECIFICATIONS

Concert 88 Camera Wireless System

Working Range..... 300' (100m) line-of-sight
 Dynamic Range..... >100dB A-weighted
 Signal To Noise >90dB

CR88V Micro Wireless Receiver

Audio Output Level +9dBu
 Audio Output Impedance 1k Ω
 Headphone Output Impedance 16 Ω
 Battery Life..... 12 hours from lithium ion battery

CH88 Handheld Transmitter

Microphone Element Samson Q8 dynamic
 RF Power..... 10 mW EIRP
 Battery Life..... 8 hours from 2 x AA batteries

CB88 Beltpack Transmitter

Input Impedance..... 1M Ω
 RF Power 10 mW EIRP
 Battery Life..... 8 hours from 2 x AA batteries
 Accessories..... Carry case, 2 x audio cables, 2 x lithium ion batteries, USB battery charger/cable

Gift Box Dimensions (All)..... 7.25" x 12" x 3.5"
 (186mm x 303mm x 89mm)
