

High Impedance Line Level Microphone

CAMMIC 1.5' cable

Features

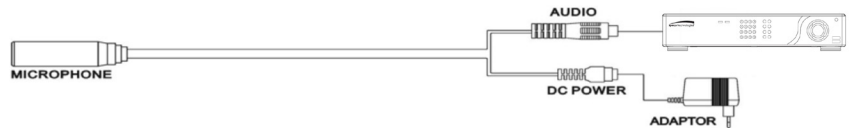

The CAMMIC is a unique microphone from Speco Technologies in that it can be connected to a line level input on an amplifier or DVR instead of a microphone level input. This provides great flexibility on units that have all microphone inputs occupied or that don't have a microphone input at all. It's especially ideal for recording channel specific audio on DVRs with that capability.

- Add-on mini microphone for all applications
- High sensitivity
- Power/audio cable
- Easy to install and ideal for all security surveillance voice recording applications
- Unique line level output
- 12VDC operation (not included)

Specifications

Type..... Condenser
 Weight 0.1 lbs.
 Impedance..... 10K Ohms
 Sensitivity -62dB ± 3dB
 Vcc..... 1.5k Ohms
 Frequency Range 20Hz ~ 16kHz
 Directivity Omni-directional
 Audio Output..... Max 2Vp-p
 Power Consumption 10mA
