Luminex LumiNode Processing Engines and DMX PortsLuminex
NETWORK INTELLIGENCE

Now is your chance to prepare for the future. On one hand the LumiNode converts Ethernet to DMX. And on the other hand, thanks to its processing engines, it is ready for that one special day when copper DMX cables are no longer employed in the entertainment lighting industry. The LumiNode series is a new range of network converter, inheriting more than a decade of experience from the Luminex Ethernet-DMX converter design and manufacturing. In the past, most of the people were designing their system according to the number of universes & DMX ports they would need on lighting control system.

MOTU AVB Switch Five-port AVB Ethernet Switch

MOTU

Audio Video Bridging (AVB) is the exciting new extension to Ethernet specifically engineered for real-time, low-latency, fully synchronized streaming of audio and video over Ethernet. AVB fulfills the promise of a true A/V standard that brings together the worlds of networking technology and professional audio/video.

- Industry standard IEEE 802.1 AVB Ethernet switch.
- Plug-and-play - supports automatic device discovery and network bandwidth management among connected AVB devices. No IT expertise required.
- Standard cabling - use standard CAT-5e or CAT-6 Ethernet cables up to 100 meters.
- 1-Gigabit operation - supports high audio channel counts and very low latency.
- Guaranteed quality of service - all existing audio and video streams are maintained, regardless of other network traffic.
- Network-wide clock and sync accurate to nanoseconds.

NETWORK INTELLIGENCE**Luminex GigaCore 26i Install 24-Port & 6-SFP Port Gigabit Ethernet Switch**BEST
SELLER

The Luminex GigaCore 26i is a Gigabit Ethernet switch providing a budget friendly solution when port density matters. The unit comes with all the advanced functionalities of the GigaCore Ethernet switches range, in a fully AV-installation oriented package. The unit offers 26 Gigabit ports that are all connected on the front panel. Each port on the switch will have colored mode led indications which will indicate different properties of the port such as: PoE, redundancy and group membership.

Same technology, different applications The GigaCore 26i has considerably more ports than all its predecessors in the GigaCore range. This high port density switch (24x RJ45 and 6x SFP) is designed to offer more capacity for large system integrations such as theaters, concert halls, convention centers, sports arenas, studios, cruise ships, theme parks, hotels, houses of worship and other fixed installations.

Fiberplex 6 Port 10/100/1000 Ethernet Switch 4 Copper Ports with 2 SFP Optical Ports

Elegantly simple yet packed with an advanced feature set, the FiberPlex Technologies TIS-8632 is a powerful 6 Port 10/100/1000 Ethernet Switch. The unit features (4) RJ-45 UTP ports as well as (2) flexible SFP ports. The TIS-8632 is part of the FiberPlex TD Import Series. Two or more TIS-8632 can be chained together via fiber to provide a distributed solution where isolation, distance, security and/or noise immunity is needed between nodes. Locally, an 8 copper x 2 optical switch can be created using a Passive SFP Cable Assembly between SFP ports. This cable saves cost by replacing (2) optical modules and a fiber cable with an inexpensive copper jumper.

Libec QD-30M Tripod System with Mid-Level Spreader

Libec QD-30M Tripod System with QH3 Head, T150B Tripod, BR-6B

Libec

Mid-level Spreader, and FP-6B Large Rubber Feet. "QD" stands for "Quality Defined". The QD Series redefines the Price Quality Relationship in this price range, bringing a new balance between price, payload, and performance. The Smooth Counterbalance System is a unique Libec technology that allows the counterbalance knob to be adjusted with constant motion to smoothly reach the minimum and maximum power range. The foldaway knob is designed for easy speedy adjustments. The counterbalance power level can be easily viewed by looking at the meter. For the camera system's safety, the head can be physically locked into a center tilt position. Even at a distance, the arrow shaped knob and Lock/Unlock symbols are visible. The BL-150 ball base adapter is included inside the kit, which converts the flat base head into a 150mm ball head.

Green Glue RGG400200 Noiseproofing Sealant

GREEN GLUE

It takes just minutes to apply Green Glue Noiseproofing Sealant along edges and cracks. It dries completely in 48 hours. No training is necessary to use Green Glue Noiseproofing Sealant-it is applied in the same fashion as standard caulking material. The sealant comes in 28-ounce tubes that fit into quart-sized caulking guns. Clean up is simple with just soap and water, even when wet. It can be painted over once dry. Adding Green Glue Noiseproofing Sealant to your soundproofing project can reduce noise transmission by 100 times or more. Green Glue Noiseproofing Sealant

exceeds LEED green building requirements and has been independently tested by Underwriters Laboratories for fire safety and environmental impact.

Green Glue Acoustic Glue 28 Ounce Tube

GREEN GLUE

Green Glue is a constrained layer damping system, which as a damping material is sandwiched between two other rigid materials such as two sheets of drywall or any other porous building material. Damping occurs when the viscoelastic center of the "sandwich" is sheared. Green Glue works effectively against any impact or airborne noise control problem. Green Glue can be used over any existing wall, floor or ceiling by simply adding another layer of material. No rolling, painting or troweling is necessary. Just open the tube and apply in a random pattern. With a fast and easy

installation, anybody can soundproof a room with Green Glue.

Green Glue Noiseproofing Joist Tape 100 Feet x 1-7/16-Inch

One of the biggest noise complaints is the sound of footsteps and squeaky floors. The squeaking that's driving you crazy occurs naturally when floors settle, and joists rub together with subflooring. There's an easy solution: Green Glue Noiseproofing Joist Tape. The tape creates an airtight seal and dampens foot traffic, so that annoying squeaking becomes a thing of the past.

A woman with long dark hair, wearing a red dress and a black jacket, is smiling and looking towards a man. The man is wearing a black shirt and a headset with a microphone, and is pinning a small object (likely a lapel microphone) to her jacket. They are in a dimly lit room with bright lights in the background, suggesting a film set or studio environment. A thin green line runs diagonally across the image.

Greenlee 06186 Cable Caster Wire Pulling Tool

The Greenlee Cable Caster saves countless hours pulling cables through open spaces - especially drop ceilings. Just cast a dart - up to 50 feet away - and reel in the cable. It's like fishing on the job! 50 feet (15 m) range allows for faster installations with fewer pulls.

- Bright yellow body reduces chances of leaving the CableCaster behind.
- Glow-in-the-dark darts minimize replacement costs because they are easy to locate.
- Aerodynamic darts provide high accuracy and fast installation.
- Optional flashlight improves visibility.

Heavy Duty Crush Resistant Tube with Pulling Eye

Complex ProTac Field Snakes

The Ultimate Fiber Optic OB & ENG Tactical Snake!

The Complex ProTac tactical snake is a special ruggedized version of our popular fiber optic snakes featuring a translucent, crush resistant, reusable protective tube for pulling and field deployment. The ProTac series offers maximum critical protection where it's needed most, at the Connector and Fan-Out area. Fan-outs are safely housed in the ProTac cover and the cover has a convenient pulling eye. Designed for maximum protection, the ProTac fiber deployment reel system is IP68 rated with the pulling sock is installed. The pulling eye and tactical sleeve protect fiber and connectors by transferring the tensile or pulling force to the cable structure.

Amphenol 12G High-Frequency HD-BNC Connectors for Broadcast

Ultra High Definition Video (also known as "Ultra HD" or "4K"), with 4x the resolution of 1080P HD video, requires an interconnect system that can transfer data at a rate of up to 12 Gbps. Using legacy BNC connectors often supporting a max frequency of 3 GHz, this could require 2 or 4 channels.

Amphenol RF's line of 12G BNC and HD-BNC products are optimized for 4K Ultra HD Broadcast, providing fully intact signal transmission on a single channel. These connectors are designed for 12G-SDI video applications, and come in a variety of PCB mounting and cable terminations. Peak performance can be reached when Amphenol RF 12G connectors are used as a mated pair.

TRUE OUTDOOR PROTECTION

The highly innovative entertainment industry is permanently evolving accompanied by increasing demands on interconnection systems. Particularly environmentally sealed connectors are highly requested for heavy duty and harsh environment

applications of entertainment equipment like PA systems, signs and LED screens or lightings. Neutrik took up the challenge and developed a new line of TRUE OUTDOOR PROTECTION (TOP) products for demanding outdoor applications.

- Heavy duty sealed power connector for harsh and demanding environment
- Outdoor protection according to IP65 and UL50E enclosure type 4 (in mated condition)
- Uses high impact UV-resistant materials
- True mains connector with breaking capacity (CBC)
- Lockable 16 A single phase connector (USA: 20 A)
- Easy and reliable twist lock system • Extremely robust and reliable
- Unique Neutrik cable retention • ENEC certified according to IEC 60320 • UL498 certified

Neutrik PowerCON TRUE1 TOP Cable End Connectors

The powerCON TRUE1 TOP is a locking 16 A true mains connector for outdoor applications. It replaces appliance couplers wherever a very rugged solution in combination with a locking device is needed in order to guarantee a safe power connection. The powerCON TRUE1 TOP is a connector with breaking capacity (CBC), i.e. it can be connected or disconnected under load or live.
